PROFESSIONAL SUMMARY

Early-career IT professional with a builder's mindset, specializing in translating business needs into practical AI-based solutions. MSc in Digital Business and Innovation from VU Amsterdam (2026), on top of a technical BSc in Information Systems (cum laude). Experienced in requirements gathering, process mapping in BPMN and workshop facilitation, from an internship where my SOPs were adopted across a state-owned enterprise, to consultancy cases for Heineken and MarketResponse. Multiple national wins in business and IT competitions. Open to roles related to AI implementation, Digital Transformation and IT-Business analysis.

EDUCATION

MSc Digital Business and Innovation Vrije Universiteit Amsterdam, The Netherlands

Sep 2025 – Aug 2026

- GPA: 7.6/10
- Thesis Title: Multihoming in Generative AI Chatbots: How Information Technology Professionals Construct and Orchestrate AI Tool Portfolios (Grade: 8.5).
- Relevant Coursework: Artificial Intelligence, Digital Transformation and Business Process Management, Management of Digital Innovation, Digital Business and Information Systems.

BSc Information Systems Telkom University, Bandung, Indonesia

Sep 2021 – May 2025

- GPA 3.84/4.00 (Cum laude)
- Thesis Title: Designing Indonesian Digital Health Capability Framework (Data and Information Literacy and Technology Proficiency Domains).
- Relevant coursework: Business Process Modelling, Business Process Engineering, Enterprise Application Integration, Analysis and Design of Information System, Supply Chain Management. Data Warehouse and Business Intelligence.

WORK EXPERIENCE

Business Process Management Intern PT. Len Industri (Persero), Bandung, Indonesia

Jun 2024 – Aug 2024

- Mapped end-to-end business processes in BPMN across multiple subsidiaries, interviewing stakeholders across departments to capture how the work actually happened rather than how it was documented.
- Found where fragmented practices caused rework and inconsistency, and authored 5+ standardised SOPs defining the to-be way of working, adopted across multiple subsidiaries.
- Delivered company-wide workshops so the new processes were understood and actually used, supporting staff through the change.

PROJECTS

Heineken – Process Mining Consultancy Project

- Part of Digital Transformation & Business Process Management coursework, analysed the end-to-end global Source-to-Pay process of a multinational brewer using process mining (Celonis), comparing how the process ran country by country against its designed flow and finding conformance as low as 14.8%.
- Identified the bottlenecks and manual rework behind the deviations and translated them into requirements for a future-state process built on automated data validation, intelligent document processing and robotic process automation.
- Delivered a phased implementation roadmap and change plan, including how staff would be retrained as their role shifted from manual processing to exception handling.

MarketResponse – AI Innovation Consultancy Project

- Part of Artificial Intelligence Coursework, identified a practical AI use case at a B2B market research firm: clients were pasting confidential reports into public AI tools, so the value sat in giving them a governed alternative.
- Designed Diamond Insights, an AI assistant over the firm's own research library, with cited sources for every answer and human review of flagged outputs to keep a person in the loop. [prototype video](#) ; [code](#)
- Built the business case for shifting the firm from one-off research projects to a subscription model and checked the design against the EU AI Act.

SKILLS & TOOLS

- Business Analysis · Business Process Management (BPMN) · Process Improvement · Workflow Automation · Process Mining · Generative AI & LLMs · Prompt Engineering · Python · Data Modelling · APIs & System Integrations · IT Governance · SQL
- N8n · Azure ML · Git/Github · Figma · SAP · Visual Paradigm · Claude Code · Celonis

- [Google AI Essentials](#) (Issued July 2025)
- [Innovation Management by Erasmus University Rotterdam](#) (Issued April 2025)
- [COBIT® 2019 Foundation](#) (Issued November 2024)
- [IT Governance : A Guide for IT Professionals by Udemy](#) (Issued June 2024)
- [IT Support Google Specialization](#) (Issued November 2022)

SELECTED ACHIEVEMENTS

- **1st Winner at HI Tech National 7 UI/UX Competition 2025:** Best high-fidelity prototype, grounded in user research and usability testing.
- **Best Presentation at Bandung Datathon 2023:** Conducted exploratory data analysis and built data visualizations in Python (Pandas, Matplotlib) to surface actionable insights from real datasets.
- **1st Winner at National Technology Creation Competition 2024:** Developed a mobile-app concept driving sustainability-friendly habits for Gen-Z in Indonesia.
- **1st Winner at Kalbis National Hackathon 2022:** Designed a digital product end-to-end (problem framing, prototype, presentation) under a 72-hour constraint.
- **2nd Winner at ERP Mini Contest 2023:** Translated procurement and financial process challenges into system requirements and SAP configuration, aligning business needs with IT implementation.
