

Name : Muhamad Arvin Zulfikar
Origin: Indonesia

MSc Digital Business and Innovation at VU Amsterdam | TEDx Speaker | Artificial Intelligence Enthusiast

Live in Amsterdam

About :

I am a Master's student at Vrije Universiteit Amsterdam, currently writing my thesis about multihoming of AI chatbots in Information Technology professionals. Previously, I finished my Bachelor's degree in Information Systems from Telkom University, Indonesia, where I graduated Cum Laude as the Most Outstanding Graduate of my faculty. Outside the classroom, I participated in 40+ national and international competitions in Business (Business Plan, Business Case) and Technology (UI/UX, Data Analysis, Hackathons). I also led a 100-member scholarship organization under the Central Bank of Indonesia as Chairman and founded the School of Industrial Engineering Competitions Academy.

On the professional side, I interned at PT Len Industri, a state-owned defence and technology enterprise, where my team mapped end-to-end warehousing workflows using BPMN and conducted process awareness sessions across multiple subsidiaries of the company. I have also solved real business cases on process mining for Heineken and AI-based solution for MarketResponse as part of my Master's programme. I also hold certifications in IT Governance (COBIT 2019), Cybersecurity Fundamentals (Fortinet), and Artificial Intelligence Essentials (Google).

I am based in Amsterdam, graduating in August 2026, and actively seeking junior roles in the Netherlands. I am passionate about working at the intersection of business and technology to help organizations become more efficient through the smart application of digital solutions.

Organizational Experience :

Founder & Lead Organizer
